CONTENTS

Volume 4, Issue Nos. 1–4
International Journal for
NUMERICAL METHODS IN ENGINEERING

Issue No. 1, JANUARY–FEBRUARY

Editorial 3

E. L. Wilson and J. Penzien: Evaluation of Orthogonal Damping Matrices 5

Z. P. Bažant: Matrix Differential Equation and Higher-Order Numerical Methods for Problems of Non-Linear Creep, Viscoelasticity and Elasto-Plasticity 11

R. L. Taylor: On Completeness of Shape Functions for Finite Element Analysis 17

C. Lin and J. S. Gladwell: Non-Dimensional Surge Tank Analysis 23

W. Schmidt: A Numerical Method for the Thermodynamic Properties of Monatomic Ionized Gases 39

M. W. Chernuka, G. R. Cowper, G. M. Lindberg and M. D. Olson: Finite Element Analysis of Plates with Curved Edges 49

A. Chatterjee and A. V. Setlur: A Mixed Finite Element Formulation for Plate Problems 67

A. R. S. Ponter: The Application of Dual Minimum Theorems to the Finite Element Solution of Potential Problems with Special Reference to Seepage 85

C. C. Fu: On the Stability of Explicit Methods for the Numerical Integration of the Equations of Motion in Finite Element Methods 95

D. H. Ferriss: The Numerical Calculation of Turbulent Boundary Layer Development . 109

J. W. Leonard: Finite Element Analysis of Perturbed Compressible Flow 123

S. Singh and G. S. Ramaswamy: A Sector Element for Thin Plate Flexure 133

Short Communications 143

Issue No. 2, MARCH–APRIL

S. B. Dong, J. A. Wolf, Jr. and F. E. Peterson: On a Direct-iterative Eigensolution Technique 155

K. K. Gupta: Dynamic Response Analysis of Geometrically Non-linear Structures Subjected to High Impact 163

W. R. Flower and L. C. Schmidt: A Note on Data Checking for Large Framework Analysis 175

J. Kirkhope and G. J. Wilson: Vibration of Circular and Annular Plates Using Finite Elements 181

J. M. Gersting, Jr. and D. F. Janowski: Numerical Methods for Orr–Sommerfeld Problems 195

J. M. Vance and A. Sitchin: Numerical Solution of Dynamical Systems by Direct Application of Hamilton's Principle 207

P. P. Lynn and B. S. Dhillon: Convergence of Eigenvalue Solutions in Conforming Plate Bending Finite Elements 217

B. Mohraz: A Lumped Parameter Element for the Analysis of Hyperbolic Paraboloid Shells 235

M. M. Gupta and R. P. Manohar: Numerical Solution of a Separated Viscous Flow Problem by a Non-uniform Finite-difference Net 251

Z. M. Elias: Mixed Finite Element Method for Axisymmetric Shells 261

R. O. Davis, Jr.: Numerical Approximation of One-dimensional Consolidation . . . 279

J. Aboudi: Propagation of Transient Pulses from a Spherical Cavity in a Viscoelastic Medium 289

Short Communications 310

Issue No. 3, MAY–JUNE

O. De Donato and G. Maier: Mathematical Programming Methods for the Inelastic Analysis of Reinforced Concrete Frames Allowing for Limited Rotation Capacity. . 307

G. Dupuis: An Iterative Approach to Structural Optimization 331

B. G. Secrest and W. W. Boyd: The Finite Element Method Applied to Ideal Gaseous Mixtures 337

M. A. Muspratt: Stochastic Plastic Analysis of a Shell 345

W. C. Carpenter: Viscoelastic Stress Analysis 357

L. C. P. Yam: A Conforming Finite Element with Internal Equilibrium for Two-Dimensional Problems 367

K. K. Gupta: Solution of Eigenvalue Problems by Sturm Sequence Method 379

P. Silvester: Tetrahedral Polynomial Finite Elements for the Helmholtz Equation . . 405

T. Y. Yang: Finite Displacement Plate Flexure by the Use of Matrix Incremental Approach 415

J. V. Huddleston: Effect of Shear Deformation on the Elastica with Axial Strain . . 433

Short Communications 445

Issue No. 4, JULY–AUGUST

G. Maier, A. Zavelani-Rossi and D. Benedetti: A Finite Element Approach to Optimal Design of Plastic Structures in Plane Stress 455

R. A. Tinawi: Anisotropic Tapered Elements Using Displacement Models 475

B. L. Pierson: A Survey of Optimal Structural Design Under Dynamic Constraints . . 491

T. Taz Branlette and J. W. Leonard: Finite Element Analysis of the Linearized BGK Boltzmann Equation 501

N. Hajdin and D. Krajcinovic: Integral Equation Method for Solution of Boundary Value Problems of Structural Mechanics. Part I. Ordinary Differential Equations . 509

N. Hajdin and D. Krajcinovic: Integral Equation Method for Solution of Boundary Value Problems of Structural Mechanics. Part II. Elliptic Partial Differential Equations 523

A. K. Runchal: Convergence and Accuracy of Three Finite Difference Schemes for a Two-Dimensional Conduction and Convection Problem 541

D. B. Spalding: A Novel Finite Difference Formulation for Differential Expressions Involving Both First and Second Derivatives 551

K. I. Majid and D. Anderson: Optimum Design of Hyperstatic Structures 561

G. C. Nayak and O. C. Zienkiewicz: Note on the 'Alpha' Constant Stiffness Method for the Analysis of Non-Linear Problems 579

P. Clement and J. Descloux: On the Rigid Displacement Condition 583

E. G. Denman: A Numerical Method for Coupled Differential Equations 587

Short Communications 597

Table of Contents, Volume 4 603

Author Index 607

INTERNATIONAL JOURNAL FOR NUMERICAL METHODS IN ENGINEERING, VOL. 4, 607–608 (1972)

AUTHOR INDEX, VOLUME 4

Aboudi, J.: Propagation of transient pulses from a spherical cavity in a viscoelastic medium, 289
Anderson, D.: see Majid, K. I., 561

Bažant, Z. P.: Matrix differential equation and higher-order numerical methods for problems of non-linear creep, viscoelasticity and elasto-plasticity, 11
Benedetti, D.: see Maier, G., 455
Boyd, W. W.: see Secrest, B. G., 337

Carpenter, W. C.: Viscoelastic stress analysis, 357
Chatterjee, A., and Setlur, A. V.: A mixed finite element formulation for plate problems, 67
Chernuka, M. W., Cowper, G. R., Lindberg, G. M., and Olson, M. D.: Finite elemen tanalysis of plates with curved edges, 49
Clement, P., and Descloux, J.: On the rigid displacement condition, 583
Cowper, G. R.: see Chernuka, M. W., 49

Davis, Jr., R. O.: Numerical approximation of one-dimensional consolidation, 279
De Donato, O., and Maier, G.: Mathematical programming methods for the inelastic analysis of reinforced concrete frames allowing for limited rotation capacity, 307
Denman, E. G.: A numerical method for coupled differential equations, 587
Descloux, J.: see Clement, P., 583
Dhillon, B. S.: see Lynn, P. P., 217
Dong, S. B., Wolf, Jr., J. A., and Peterson, F. E.: On a direct-iterative eigensolution technique, 155
Dupuis, G.: An iterative approach to structural optimization, 331

Elias, Z. M.: Mixed finite element method for axisymmetric shells, 261

Ferriss, D. H.: The numerical calculation of turbulent boundary layer development, 109
Flower, W. R., and Schmidt, L. C.: A note on data checking for large framework analysis, 175
Fu, C. C.: On the stability of explicit methods for the numerical integration of the equations of motion in finite element methods, 95

Gersting, Jr., J. M., and Janowski, D. F.: Numerical methods for Orr–Sommerfeld problems, 195
Gladwell, J. S.: see Lin, C., 23
Gupta, K. K.: Dynamic response analysis of geometrically non-linear structures subjected to high impact, 163
——: Solution of eigenvalue problems by Sturm sequence method, 379
Gupta, M. M., and Manohar, R. P.: Numerical solution of a separated viscous flow problem by a non-uniform finite-difference net, 251

Hajdin, N., and Krajcinovic, D.: Integral equation method for solution of boundary value problems of structural mechanics. Part I: Ordinary differential equations, 509; Part II: Elliptic partial differential equations, 523
Huddleston, J. V.: Effect of shear deformation on the elastica with axial strain, 433

Janowski, D. F.: see Gersting, Jr., J. M., 195

Kirkhope, J., and Wilson, G. J.: Vibration of circular and annular plates using finite elements, 181
Krajcinovic, D.: see Hajdin, N., 509, 523

Leonard, J. W.: Finite element analysis of perturbed compressible flow, 123
——: see Taz Branlette, T., 501
Lin, C., and Gladwell, J. S.: Non-dimensional surge tank analysis, 23
Lindberg, G. M.: see Chernuka, M. W., 49
Lynn, P. P., and Dhillon, B. S.: Convergence of eigenvalue solutions in conforming plate bending finite elements, 217

Maier, G.: see De Donato, O., 307
——, Zavelani-Rossi, A., and Benedetti, D.: A finite element approach to optimal design of plastic structures in plane stress, 455
Majid, K. I., and Anderson, D.: Optimum design of hyperstatic structures, 561
Manohar, R. P.: see Gupta, M. M., 251
Mohraz, B.: A lumped parameter element for the analysis of hyperbolic paraboloid shells, 235
Muspratt, M. A.: Stochastic plastic analysis of a shell, 345

Nayak, G. C., and Zienkiewicz, O. C.: Note on the 'alpha'-constant stiffness method for the analysis of non-linear problems, 579

Olson, M. D.: see Chernuka, M. W., 49

Penzien, J.: see Wilson, E. L., 5
Peterson, F. E.: see Dong, S. B., 155
Pierson, B. L.: A survey of optimal structural design under dynamic constraints, 491
Ponter, A. R. S.: The application of dual minimum theorems to the finite element solution of potential problems with special reference to seepage, 85

Ramaswamy, G. S.: see Singh, S., 133
Runchal, A. K.: Convergence and accuracy of three finite difference schemes for a two-dimensional conduction and convection problem, 541

Schmidt, L. C.: see Flower, W. R., 175
Schmidt, W.: A numerical method for the thermodynamic properties of monatomic ionized gases, 39
Secrest, B. G., and Boyd, W. W.: The finite element method applied to ideal gaseous mixtures, 337
Setlur, A. V.: see Chatterjee, A., 67
Silvester, P.: Tetrahedral polynomial finite elements for the Helmholtz equation, 405
Singh, S., and Ramaswamy, G. S.: A sector element for thin plate flexure, 133
Sitchin, A.: see Vance, J. M., 207
Spalding, D. B.: A novel finite difference formulation for differential expressions involving both first and second derivatives, 551

Taylor, R. L.: On completeness of shape functions for finite element analysis, 17
Taz Branlette, T., and Leonard, J. W.: Finite element analysis of the linearized BGK Boltzmann equation, 501
Tinawi, R. A.: Anisotropic tapered elements using displacement models, 475

Vance, J. M., and Sitchin, A.: Numerical solution of dynamical systems by direct application of Hamilton's principle, 207

Wilson, E. L., and Penzien, J.: Evaluation of orthogonal damping matrices, 5
Wilson, G. J.: see Kirkhope, J., 181
Wolf, Jr., J. A.: see Dong, S. B., 155

Yam, L. C. P.: A conforming finite element with internal equilibrium for two-dimensional problems, 367
Yang, T. Y.: Finite displacement plate flexure by the use of matrix incremental approach, 415

Zavelani-Rossi, A.: see Maier, G., 455
Zienkiewicz, O. C.: see Nayak, G. C., 579
